

Explain how two level application is implemented in web application, mobile application and email.  
Show evidence.

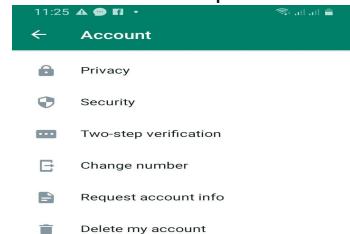

Mobile application:

Whatsapp

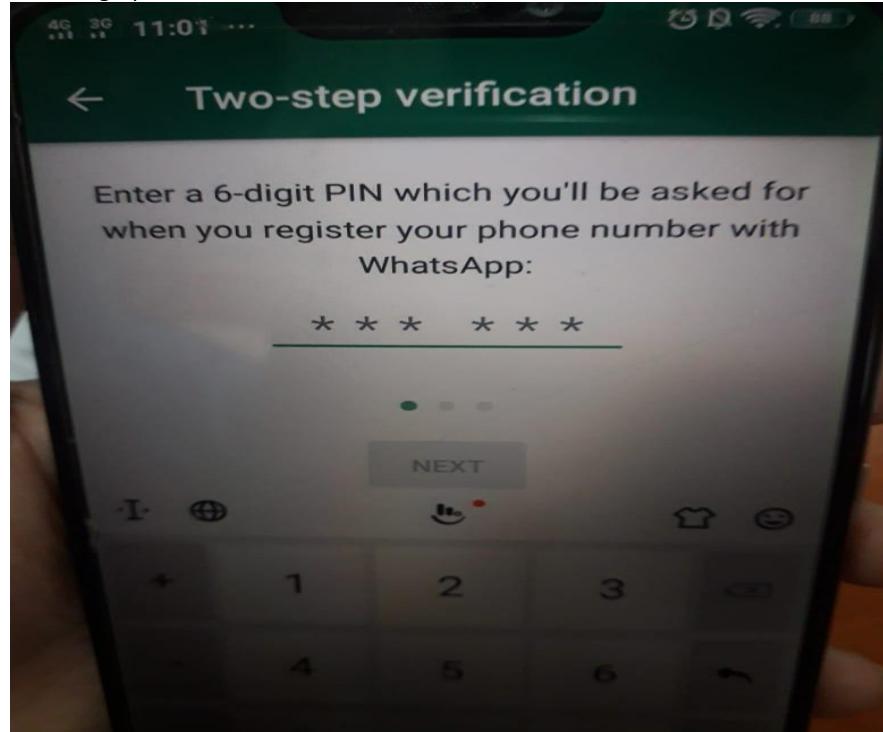

1. Go to the setting of Whatsapp

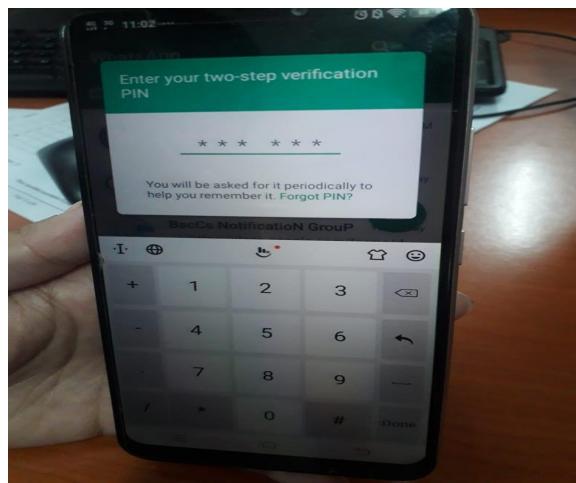

2. Go to two step verification

3. Enter six digit password

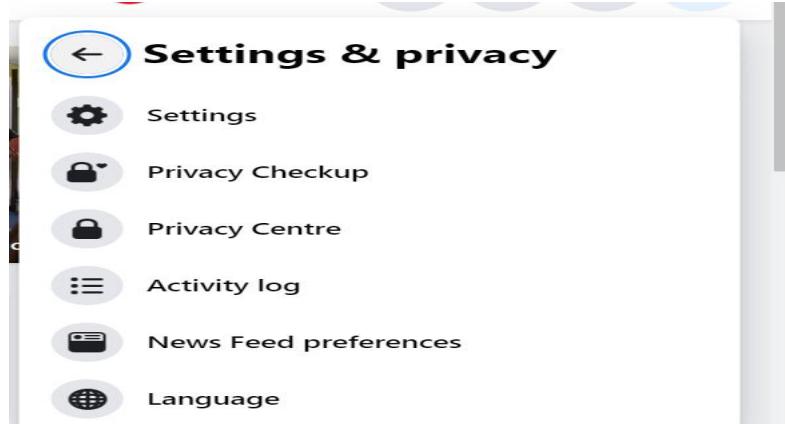

4. Conform the password
5. When we login whatsapp it ask for six digit password for verification

Web Application:

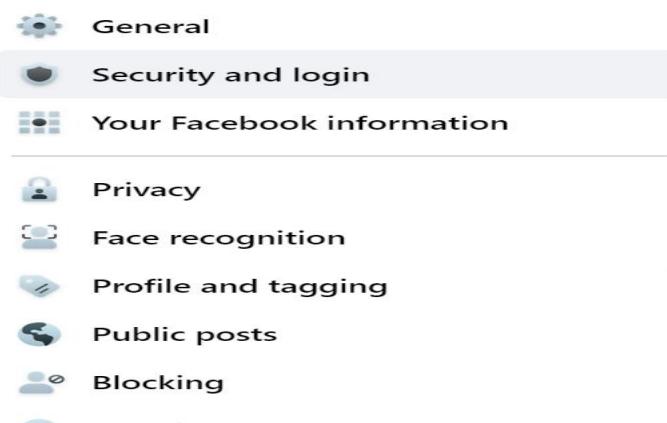

Facebook

1. Go to setting of Facebo ok

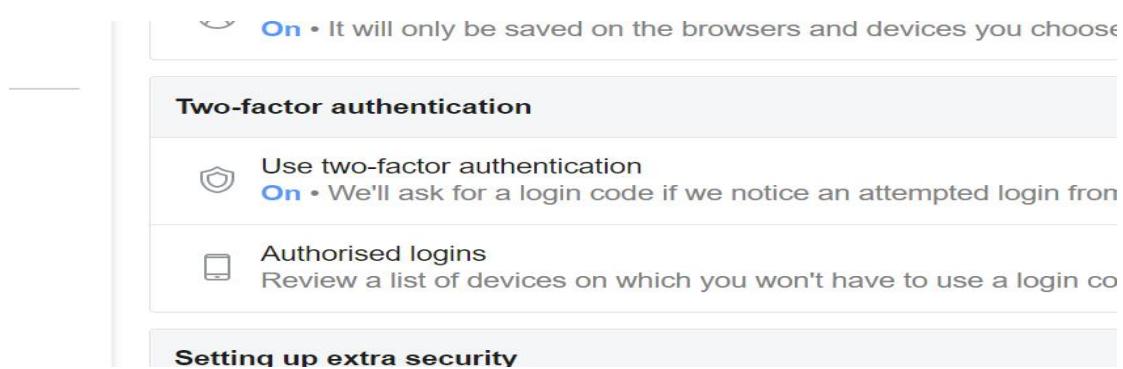

2. Go to security and login

## Settings

3. Go to two-factor authentication

4. Set password of your choice.

Email:

A. Go to setting of email, and accounts and import and click on change password recovery options

The screenshot shows the Gmail settings interface. The top navigation bar includes the Gmail logo, a search bar labeled "Search mail", and various icons. Below the bar, a sidebar on the left lists "General", "Labels", "Inbox", "Accounts and Import" (which is highlighted in blue), "Filters and Blocked Addresses", "Forwarding and POP/IMAP", "Add-ons", "Chat and Meet", "Advanced", and "Offline". The main content area under "Accounts and Import" contains sections for "Change account settings" (with links to "Change password", "Change password recovery options", and "Other Google Account settings"), "Using Gmail for work?" (with a link to "Learn more"), and "Import mail and contacts" (with a link to "Learn more" and "Import mail and contacts"). A "Themes" section is also present.

B. Click on security and click on two step verification

The screenshot shows the Google Account security settings page. On the left, a sidebar lists "Home", "Personal info", "Data & privacy", "Security" (which is highlighted in blue), "People & sharing", "Payments & subscriptions", and "About". The main content area is titled "Signing in to Google" and features a graphic of a smartphone, laptop, and tablet connected by lines. It displays three sections: "Password" (last changed Mar 1), "2-Step Verification" (status: On), and "App passwords" (status: None). Each section has a "View" or "Edit" link to its right.

C. Verify your gmail account

The screenshot shows a Google verification page. At the top, it says "Hi damtz" and displays the email address "damtzmarcello@gmail.com". Below this, a message reads "To continue, first verify it's you". There is a password input field containing "....." and a "Show password" checkbox. At the bottom, there are links for "Forgot password?" and a large blue "Next" button.

D. Put on the 2-step verification, then when we login gmail it will ask whether it is you or not in gmail.

← 2-Step Verification

2-Step Verification is ON since May 27, 2022

TURN OFF

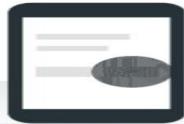

Available second steps

A second step after entering your password verifies it's you signing in. [Learn more](#)

 **2-Step Verification**

To help keep your account safe, Google wants to make sure it's really you trying to sign in

 damtzmarcello@gmail.com ▾

**Check your Galaxy J6**

Google sent a notification to your Galaxy J6. Tap **Yes** on the notification to verify it's you.

Don't ask again on this device
